Executive Summary

To most New Yorkers, the face of homelessness is the person they see on the street or in a subway station—typically an adult male, perhaps panhandling for change, talking to himself or quietly suffering. Yet single adults actually constitute a minority of the city’s homeless.¹ The invisible face of homelessness is that of a child.

During the 2013–14 school year, approximately 28,000 school-age children were living in shelters, 49,000 were living doubled up with other households, and 7,000 were living outside shelters or residences (or in an unspecified location), in some cases potentially on the street or in empty buildings. If these 84,000 students lived together, they would form a small city—the size of Trenton, NJ.

Between 2010 and 2013, the number of school-age homeless children in New York City grew by 25%, even as the number of all school-age children remained roughly the same. This ominous trend seems to be driven by shrinking availability of low-income affordable housing, stagnating wages, and migration of higher-

income New Yorkers into low-income communities. Whatever broad economic recovery is taking hold in New York City does not appear to have reached extremely low-income New Yorkers, for whom unstable employment and housing have become the new normal. As a result, thousands of the city’s children each year experience instability in the form of hunger, frequent moves, chronic health problems, and anxiety for their family’s future. Moreover, these children most often struggle with disruptions to their educational progress and fall behind in school.

Given the scope and direction of homelessness among school-age students, it is imperative for policymakers and educators to know more about their experiences in school. Until now, such information has never been

¹ NYC Department of Homeless Services, *Daily Report*, July 17, 2015.

available. *The Atlas of Student Homelessness in New York City* provides a detailed picture of homelessness within the city's educational system: where homeless students go to school, what kinds of supports they may need, and what their academic outcomes look like. This picture dispels the notion that homeless students are the same as other poor students.

The data for this *Atlas* was provided primarily by the New York City Department of Education. Federal law entitles homeless children to certain educational rights and supports including immediate enrollment in school without the usual required documents and records, which may not be readily available. Based on their needs and district resources homeless students receive assistance that may include school supplies, transportation, clothes, and afterschool programs, as well as other supports. In New York City, schools receive technical support from the Students in Temporary Housing Unit (STH) within the Department of Education and from the New York State Technical & Education Assistance Center for Homeless Students (NYS TEACHS). Teachers and other school personnel are often the first to identify homeless children who have slipped between the cracks of the city's support systems. This "first responder" role makes schools a vitally important resource for meeting the needs of homeless children and their families.²

2 New York City Department of Education. Students in Temporary Housing, <http://schools.nyc.gov/StudentSupport/NonAcademicSupport/StudentsinTemporaryHousing/default.htm> (accessed July 20, 2015).

Key Citywide Findings

One out of every nine students in NYC public schools in SY 2013–14 had experienced homelessness within the past four school years.

One out of four homeless students had English Language Learning needs in SY 2013–14, compared to one in seven housed students.

Over half (51%) of all homeless students in New York City were Hispanic in SY 2013–14.

Thirty-eight percent of homeless students were chronically absent (missed more than 20 days of school) in SY 2013–14, compared to 22% of housed students.

Of all students scheduled to graduate in SY 2013–14, 20% of homeless students dropped out compared to 9% of their housed peers. Homeless students include all students who experienced homelessness during high school.

On all educational indicators, homeless students achieved worse outcomes than housed students, including housed students eligible for free lunch.

Child homelessness is experienced one neighborhood, school, or shelter at a time. Citywide findings can illuminate the larger context of school-age child homelessness in New York City, but they do not provide local texture or opportunity for comparisons between districts and schools. To get closer to the lived experience of homeless school-age children, the *Atlas* profiles each of the city's 32 school districts.

The instability of homelessness can leave lasting scars in a child's development. Recent brain research has found that acute and chronic stress experiences can traumatize children, overloading the stress-response center in their brains and weakening executive function skills.³ Homelessness is believed to contribute to a number of these stress experiences, which combine to make the normal challenges of navigating school and society even more difficult. With more and more children experiencing homelessness, it is vitally important to understand the unique challenges that homeless students face and the interventions and opportunities available to help them.

³ Robert F. Anda et al, The enduring effects of abuse and related adverse experiences in childhood: A convergence of evidence from neurobiology and epidemiology. *European archives of psychiatry and clinical neuroscience*. 2006;256(3):174-186. doi:10.1007/s00406-005-0624-4.

Key District-level Findings

The total number of homeless children attending school in a single New York City school district in SY 2013–14 ranged from 630 in District 26 (Queens) to over 8,500 in District 10 (Bronx).

The percent of the student body that was homeless by district ranged from a low of 2% in District 26 to a high of 18% in the Bronx's District 9. No district had a student homelessness rate of less than 2% in SY 2013–14.

While the average rate of homelessness among students in New York City was 8% in SY 2013–14, in some schools up to 46% of students were homeless.

In eight schools, homeless students comprised at least 40% of the student body in SY 2013–14.

In three schools, students who had been homeless at some point between SY 2010–11 and 2013–14 comprised at least 50 percent of the student body.

Methodology

The New York City Department of Education provided access to de-identified student level data for all students attending New York City public schools between the school years of 2010–11 and 2013–14. These data, recorded at the end of each school year, were linked to annual student housing status information through a unique scrambled student identifier. All students were geocoded based on their last school of enrollment and their school district number. In order to protect student privacy and adhere to the Federal Education Rights and Privacy Act, all numbers and percentages that could potentially reveal 10 or fewer students have been redacted. For data reliability, all percentages calculated using less than 30 students have also been omitted.

Out of 1,752 total public schools in New York City in SY 2013–14, 1,677 had a physical address and were mappable. An additional 310 schools in which 10 or fewer students were homeless were excluded to protect student privacy, leaving 1,367 schools in the citywide map. Because of the large degree of variation in school district size, individual district maps are shown in five different scales, with the distance per inch at the bottom. Natural breaks were used to create groupings for all maps, unless otherwise noted. Data analysis for the atlas was conducted in Stata and geographic maps were created in ArcGIS.

Limitations

Because homeless students are eligible under McKinney-Vento law to remain at their school of origin or enroll in their local school, data represents where students attend school and should not be interpreted as providing information about where homeless students live. Information presented in this Atlas is specific to homeless students attending New York City Department of Education Public Schools and should not be generalized to New York City Charter Schools. While the total number of homeless charter school students is reported to the State annually, more detailed information on the outcomes of homeless students attending charter schools is not publicly available. Finally, information on homeless students and families is self-reported by the family. A family that does not wish to be identified as homeless may not report that status.

School District Pages

Location of School District in New York City.

Number of shelter units and shelters in the district for families with children. The number of units is a rough approximation of the total number of families in shelter in the school district.

Rankings are shown by borough and citywide. The higher the ranking, the greater the percent of students who are homeless.

Because homeless students do not always live in their school district the number of students in shelter is not necessarily related to the number of shelter units in the District.

Comparison between homeless students, housed students who are poor, and housed students who are not poor within the district. Eligibility for free or reduced price lunch is used as a proxy for student poverty.

Data specific to homeless students attending school within the district.

Unsheltered	5%
Other	1%

Note: The number of shelter units in a school district and the number of "Sheltered" students are not the same. Sheltered students may attend schools in districts where they do not live, and each shelter unit can house more than one child. The total number of "Unsheltered" students may be less reliable than other categories.

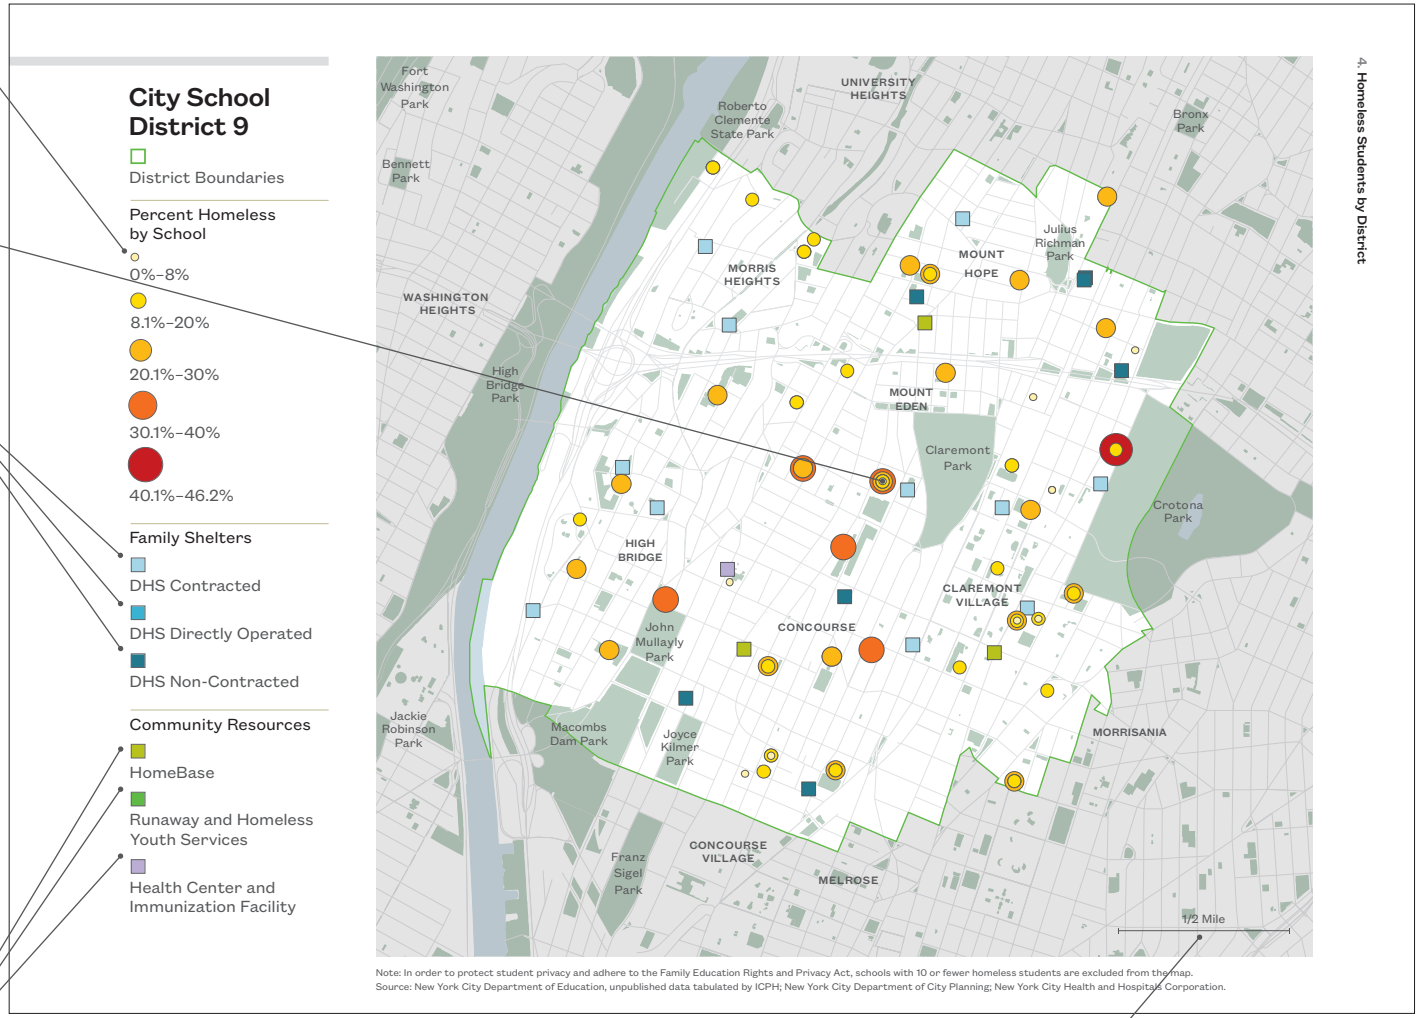

Sources: New York City Department of Education, unpublished data tabulated by ICPH; New York City Department of City Planning.

Color and size of dots represent the proportion of homeless students at each school. As the percent increases, the color darkens and the dot size becomes bigger.

Concentric circles with multiple colors indicate co-located schools with differing rates of homelessness.

Blue squares indicate the three categories of shelters for families with children. DHS-contracted shelters are shelters with an official contract with the city. These are typically run by mission-driven non-profits and as a result tend to have greater access to social support services. DHS directly operated shelters are owned and operated by the New York City Department of Homeless Services. Only three remain. Non-contracted emergency shelters operate on a "per diem" basis with the city. The lack of oversight and accountability means they are more prone to health and safety violations and less likely to have social services on site.¹

Green and purple squares indicate the locations of community resources for homeless students and their families. Homebase locations offer resources and

referrals for families struggling with poverty, such as eviction prevention mediation, financial counseling, short-term emergency funding, and public benefit assistance. Runaway and homeless youth services provide a range of supports for unaccompanied youth, including Drop-in Centers, Crisis Shelters, Transitional

Independent Living Programs and Street Outreach. Programs also support youth who are pregnant or parenting, LGBTQ youth and youth who have experienced sexual exploitation. Health and Immunization Centers represent clinics and hospitals in New York City that are run by the New York City Health and Hospitals

Corporation. These provide free or low cost medical care to people regardless of immigration status or ability to pay and can be valuable referral sites for homeless students whose immunization records are not up to date or for those who struggle with chronic health conditions such as asthma and diabetes.

Because of the large degree of variation in school district sizes, district maps are displayed at five different zoom levels. Maps at the two highest zoom levels include park names for additional geographic reference, and scales are included in all maps to show relative distance.

1. Overview: Homeless Students in New York City

Rising family homelessness impacts virtually every school district across the city. Over 84,000 students attending New York City Public Schools were homeless in School Year (SY) 2013–14, and one out of every nine students experienced homelessness at some point between SY 2010–11 and SY 2013–14. The information presented in this section provides an overview of homelessness among students in New York City. It examines the growth in the number of students experiencing homelessness, duration of housing instability, student demographics, the frequency of school transfers, and the number of homeless students who were left back and repeated a grade.

Across almost all educational outcomes, homeless students fare worse than housed students eligible for free lunch.

Key Findings

Students identified as homeless increased by 25% in the four years between SY 2010–11 and SY 2013–14.

For every homeless student living in a city shelter, roughly two students were living in some other temporary setting. The majority of these students were living doubled up.

The majority of homeless students in SY 2013–14 had experienced homelessness during more than one school year.

One out of four homeless students transferred schools during the 2013–14 school year compared to one in 11 housed students.

The enrollment gap between pre-K and kindergarten suggests that almost 4,000 eligible homeless children were not enrolled in a pre-K program in SY 2013–14.

Fifteen percent of all homeless students, compared to 11% of housed students, were held back and required to repeat one or more grades between SY 2010–11 and SY 2013–14. This amounts to roughly 13,000 homeless students retained over the four-year period.

Overview: Homeless Students in New York City

Student Homelessness Is Rapidly Growing

In SY 2013–14, over 84,000 New York City public school students were homeless and more than 117,000 had been homeless at some point during the last four years. This represents one out of every nine students (11%) in the New York City Public Schools.

From SY 2010–11 to SY 2013–14, the number of homeless students rose by close to 17,000, a 25% increase.

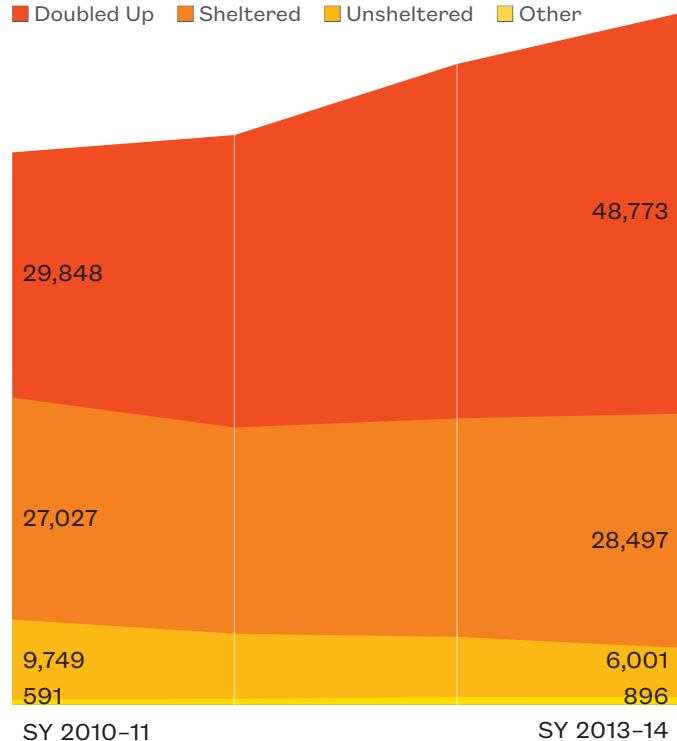

The increase in student homelessness was driven primarily by the number of students living doubled up with another family due to loss of housing or economic hardship. This group of homeless students grew by almost two-thirds (63%) in just four years. The number of sheltered students grew by only 5% during the same time period. The growth in sheltered students was slightly higher than the citywide growth in the number of shelter units for families with children (3.9%).¹

¹ *Children Services—Fiscal Year 2010*, <http://www.nyc.gov/html/dhs/downloads/pdf/family-fy10.pdf>. Accessed August 11, 2015.

Growth of Homelessness Among Students in New York City Public Schools

SY 2010–11 to 2013–14

■ Doubled Up ■ Sheltered ■ Unsheltered ■ Other

Note: The total number of "Unsheltered" students may be less reliable than other categories. Source: New York City Department of Education, unpublished data tabulated by ICPH.

Most Children Are Homeless for More than One School Year

Homelessness was not a brief or isolated experience for New York City school children.

Two-thirds of students (67%) who were homeless in SY 2013–14 had been homeless during a previous school year.

Close to one in four students (24%) were homeless all four school years (between SY 2010–11 and SY 2013–14).

Duration of Homelessness

SY 2013–2014

Source: New York City Department of Education, unpublished data tabulated by ICPH.

Hispanics and Blacks Are Over-Represented Among Homeless Students

Over half of all homeless students in New York City were Hispanic in SY 2013–14.

While Black and Hispanic students made up 68.5% of New York City public school students overall, they represented 86% of New York City students who were homeless in SY 2013–14.

Race and Ethnicity of Homeless Students

SY 2013–2014

Note: Percentages do not sum to 100% due to racial categories not shown in chart.
Source: New York City Department of Education, unpublished data tabulated by ICPH.

Young Children Most at Risk of Homelessness

In SY 2013–14, the majority of homeless students in New York City were in elementary school.

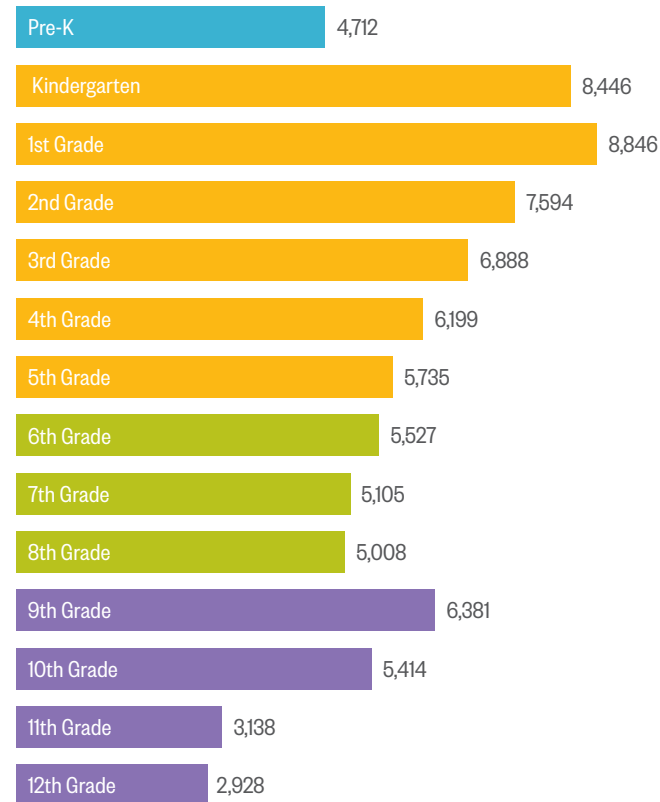

Over one-third (36%) of homeless students were in pre-K through 2nd grade, compared to 27.5% of housed students. These grades represent a critical period for learning foundational reading, writing, and math skills.

The enrollment gap between pre-K and kindergarten suggests that almost 4,000 eligible homeless children were not enrolled in a pre-K program in SY 2013–14.

(Note: In SY 2013–14 New York City's Universal pre-K program had not yet been fully expanded).

Number of Homeless Students by Grade

SY 2013–14

Note: Total students by grade does not equal the total for all homeless students. Only students in grades Pre-K – 12 are included.

Source: New York City Department of Education, unpublished data tabulated by ICPH.

Housing Instability Undermines School Stability

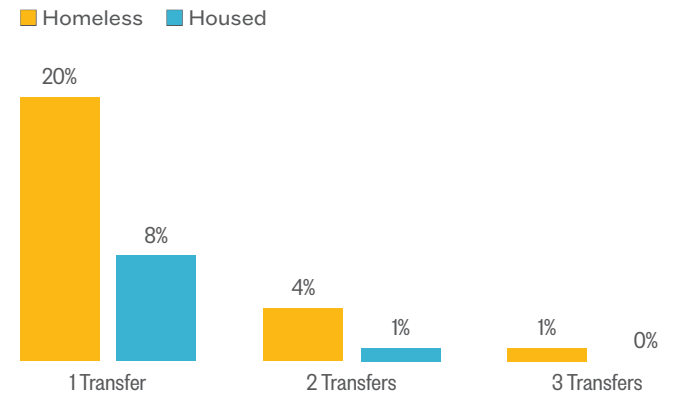

One out of every four homeless students transferred schools at least once during SY 2013–14, compared to fewer than one in ten housed students.

Homeless students were almost three times as likely to experience mid-year transfers as housed students (25% compared to 9%).

Every school transfer is estimated to set a student back academically by up to six months.¹

Number of Mid-Year Transfers Per Student

SY 2013–14

Source: New York City Department of Education, unpublished data tabulated by ICPH.

¹ U.S. Department of Education, *Report to the President and Congress on the Implementation of the Education for Homeless Children and Youth Program under the McKinney-Vento Homeless Assistance Act*, <http://www2.ed.gov/programs/homeless/rpt2006.doc> (accessed July 21, 2015).

2. Where Homeless Students Attend School

While homeless children attend schools in every district, homelessness is not equally distributed across the city. Dramatic differences are evident between districts, adjoining schools within districts, and even among schools co-located within the same building. This section provides information on the geographic distribution of homelessness among students in New York City, exploring the types of homelessness children experience, where students attend school before becoming homeless, and disruptions to school and social support networks that take place after becoming homeless.

Key Findings

In eight school districts between 14%–18% of all students were homeless in SY 2013–14, compared to a citywide average of 8%. Students in these eight districts collectively accounted for over one third of all homeless students in New York City.

On average, 8% of pre-K students were homeless in SY 2013–14, ranging from 1% in Bayside (District 26) to 21% in Central Harlem (District 5).

District 9 in the Bronx was the school district from which the largest number of students left after they became homeless between School Years 2012–13 and 2013–14.

District 10 in the Bronx was the school district to which the largest number of students transferred after becoming homeless.

The Geography of Student Homelessness

Number and Percent of Students Homeless by School District

SY 2013-2014

Number Homeless

Percent Homeless

Homelessness by school district ranged from 2% in District 26 in Queens to 18% in Bronx District 9, compared to a citywide average of 8%.

Seven school districts (2, 6, 8, 9, 10, 11, and 12) each had enrollment of over 3,000 homeless students each in SY 2013-14.

Some school districts had a smaller number of homeless students enrolled but a large proportion of all students in the district were homeless. These tended to be smaller school districts in areas of the city that also had high rates of poverty.

Note: Data is by school district and does not include schools in non-geographic districts. Percentage groupings for the map of homeless students by district and the map of homeless Pre-K students by district are matched for the purpose of comparison.

Percent Homeless

Note: Data is by school district and does not include schools in non-geographic districts. Percentage groupings for the map of homeless students by district and the map of homeless Pre-K students by district are matched for the purpose of comparison.

Source: New York City Department of Education, unpublished data tabulated by ICPH.

High-quality early education programming improves young homeless children's social and cognitive outcomes, helping to close the achievement gap between them and their poor, housed peers.¹

On average, 8% of pre-K students were homeless in SY 2013-14, ranging from 1% in Bayside (District 26) to 21% in Central Harlem (District 5).

Districts 7, 16, 17, 18, 19, 23, and 29 in the Bronx, Brooklyn, and Queens enrolled a higher proportion of homeless pre-K students than would be expected based on their overall rates of student homelessness.

Based on overall district rates of student homelessness all school districts in Manhattan (1, 2, 3, 4, 5, and 6) and one in Queens (24) enrolled a higher proportion of homeless pre-K students than would be expected. In districts with high rates of homelessness, a higher share of homeless pre-K students may indicate more successful enrollment.

Note: Comparisons were based on map "Percent Homeless" categories. These numbers represent data prior to the complete expansion of New York City's Universal pre-K program.

Though the majority of students identified as homeless do not live in shelters, the concentration of homeless students living in shelter mirrored the locations of family shelters in the city.

For every student living in shelter, there were two more students living in some other temporary situation. The majority of these students were living doubled up.

Doubled-up students attended schools across the city, including many areas with no family shelters. This pattern was particularly noticeable in areas of Queens and southern Brooklyn.

There were only five districts (5, 12, 13, 16, and 23) where the number of homeless students in shelter was greater than the number of students living doubled up.

Frequently students move to schools not only outside of their districts, but outside of their boroughs of origin. Understanding the movement patterns of children who become homeless could help school officials to minimize educational disruption.

District 9 in the Bronx was the school district from which the largest number of students left after becoming homeless between school year 2012-13 and 2013-14.

District 10 in the North Bronx was the school district to which the largest number of students transferred after becoming homeless.

Note: Data is by school district and does not include schools in non-geographic districts. Analysis includes students who were housed in 2012-13, became homeless in 2013-14 and transferred school districts. Source: New York City Department of Education, unpublished data tabulated by ICPH.

3. Educational Achievement Among Homeless Students

Not having a stable place to call home can greatly impact a child's ability to succeed in school. Homeless students are more likely to be chronically absent, to perform poorly on state English and math exams, and to drop out of school than their housed peers. While homeless students have consistently worse educational outcomes, a great deal of variation exists across school districts. This section examines differences in educational outcomes between homeless students across districts, as well as differences within districts between homeless students and housed students eligible for free lunch (a proxy for low-income status).

Key Findings

In SY 2013–14 across virtually all districts homeless students performed more poorly on all educational outcomes than both housed students eligible for free lunch and housed students who were not eligible for free lunch.

The school district with the highest absenteeism rate in SY 2013–14 was Brownsville (District 23), where 53% of homeless students were chronically absent (missing 20 or more days of school), compared to 38% of housed students eligible for free lunch.

In three school districts (4, 21, and 31), more than 60% of students who were homeless at some point during high school graduated on time—four times the 15% graduation rate in Brownsville (District 23), the lowest performing school district. The graduation rate of housed students eligible for free lunch in Brownsville was 45%, also the city's lowest.

One out of four homeless students had English Language Learning needs in SY 2013–14, compared to one in seven housed students.

Geographic Patterns of Absenteeism

Chronically absent students are more likely to repeat a grade, perform poorly on state tests, and drop out of school.¹

Chronic Absenteeism Among Homeless Students

SY 2013–2014

- 18%–22%
- 22.1%–28%
- 28.1%–36%
- 36.1%–43%
- 43.1%–53%

Note: Data is by school district for SY 2013–14 and does not include schools in non-geographic districts.
Source: New York City Department of Education, unpublished data tabulated by ICPH.

On average, 23% of students in New York City were chronically absent in SY 2013–14.

In seven school districts over 45% of homeless students were chronically absent, missing 20 days or more of school in SY 2013–14.

In SY 2013–14 absenteeism varied sharply by housing and income status: 38% of homeless students were chronically absent compared to 25% of housed students eligible for free lunch and 16% of housed students not eligible for free lunch.

There was a 36-percentage point difference between the lowest, Bay Ridge (20), at 18%, and the highest, Brownsville (23), at 53%.

¹ Johns Hopkins School of Education, *Meeting the Challenge of Combating Chronic Absenteeism*, October 2011; Baltimore Education Research Consortium, *Early Elementary Performance and Attendance in Baltimore City Schools' Pre-Kindergarten and Kindergarten*, March 2012.

Chronic Absenteeism Rate, School Year 2013–14

City/Borough/School District Name (School District #)	Homeless	Housed, free lunch	Housed, no free lunch

Identifying Students in Need of Additional Supports

Homeless Students Who Have an Individual Education Plan

SY 2013–2014

- 11%–13%
- 13.1%–17%
- 17.1%–20%
- 20.1%–23%
- 23.1%–25%

Note: Data is by school district for SY 2013–14 and does not include schools in non-geographic districts.
Source: New York City Department of Education, unpublished data tabulated by ICPH.

Individual Education Plans (IEPs) are used in New York City schools to address learning disabilities and special education needs of students. On average, 19% of students in New York City had IEPs in SY 2013–14.

Homeless students and housed students eligible for free lunch had similar rates of IEPs (20%) and higher rates than housed students not eligible for free lunch (15%) in SY 2013–14.

The proportion of homeless students identified in SY 2013–14 as having an IEP varied dramatically across districts from 11% in Bay Ridge (District 20) to 25% in Staten Island (District 31) and Bedford-Stuyvesant (District 16). The district rates for housed students eligible for free lunch ranged from 14% to 25%.

Percent of Students With An Individual Education Plan, School Year 2013–14

City/Borough/School District Name (School District #)	Homeless	Housed, free lunch	Housed, no free lunch
New York City	20.1%	19.8%	15.1%
Manhattan	19.9%	20.7%	13.7%
Lower East Side (1)	23.4%	25.4%	11.1%
Financial District/Midtown/Upper East Side (2)	16.1%	16.4%	13.2%
Upper West Side/Morningside Heights (3)	21.0%	20.7%	9.7%
East Harlem (4)	23.8%	23.4%	18.0%
Central Harlem/Manhattanville (5)	20.6%	20.7%	12.0%
Hamilton/Washington Heights/Inwood (6)	12.5%	17.3%	12.3%
Bronx	20.9%	22.9%	19.4%
Mott Haven/Melrose (7)	19.3%	22.2%	18.9%
Hunts Point/Longwood (8)	22.2%	22.6%	17.6%
Highbridge/Concourse (9)	18.2%	20.2%	15.7%
Riverdale/Bedford/Fordham/Belmont (10)	17.5%	20.3%	13.4%
Williamsbridge/Baychester/Morris Park/Co-op City (11)	19.2%	19.6%	14.6%
East Tremont (12)	19.7%	20.1%	16.2%

The extent to which differences in IEP identification rates represent differences in the actual needs of homeless students or uneven implementation of the IEP diagnostic process is an important area for further examination.

The Intersection of Homelessness and Language Needs

Homeless Students Who Are English Language Learners

SY 2013–2014

Note: Data is by school district for SY 2013–14 and does not include schools in non-geographic districts.
 Source: New York City Department of Education, unpublished data tabulated by ICPH.

The substantial overlap between homeless students and English language learners suggests potential value in coordinating services.

On average, 14% of all students citywide had English Language Learning (ELL) needs in SY 2013–14.

ELL needs varied sharply by housing and income status in SY 2013–14: 24% of homeless students had ELL needs compared to 16% of housed students eligible for free lunch and just 7% of housed students not eligible for free lunch.

The proportion of homeless students who had English Language Learning needs in SY 2013–14 ranged from just 5% in Bedford-Stuyvesant (District 16) to 55% in Bay Ridge (District 20). The proportion for housed students eligible for free lunch ranged from 5% in Bedford-Stuyvesant (District 16) and 32% in Washington Heights (District 6).

Discipline of Homeless Students

Suspension Rate for Homeless Students

SY 2013–2014

- 1.6%–3.2%
- 3.3%–5.2%
- 5.3%–7.1%

Note: Data is by school district for SY 2013–14 and does not include schools in non-geographic districts. Students were counted if they were suspended at their final school of enrollment for SY 2013–14.
Source: New York City Department of Education, unpublished data tabulated by ICPH.

While suspension rates across New York City have dropped dramatically since 2010, a great deal of variation in the use of suspensions for homeless students exists across school districts.

Homeless students and housed students eligible for free lunch both had suspension rates of about 4% in SY 2013–14, while housed students not eligible for free lunch had a much lower rate of 2%.

The citywide suspension rate for all students in SY 2013–14 was 3%.

In SY 2013–14 five school districts (7, 13, 17, 18, and 19) had suspension rates for homeless students that were at or above 6%, while only 2 districts had rates of 2% or less: Bay Ridge (District 20) and Flushing (District 25).

Suspension Rate, School Year 2013–14

High School Dropout Patterns

Analyzing best practices that help homeless students to stay in school could lead to strategies that reduce dropout rates in other districts.

Four Year Dropout Rate Among Homeless Students

Class of 2014

- 10.5%–12.3%
- 12.4%–15.6%
- 15.7%–18.8%
- 18.9%–23.3%
- 23.4%–31%

Note: Data is by school district and represents the 4-year dropout rate for students who entered high school in 2010 and experienced homelessness at any point during their high school career. Data does not include schools in non-geographic districts.
Source: New York City Department of Education, unpublished data tabulated by ICPH.

On average, 10% of all New York City students scheduled to graduate in SY 2013–14 dropped out prior to graduation.

graduating. The highest district dropout rate for housed students eligible for free lunch was 20% in SY 2013–14.

One out of every five students who experienced homelessness during high school dropped out compared to one in 11 housed students eligible for free lunch in SY 2013–14.

In three school districts (5, 17, and 21), the dropout rate for homeless students in SY 2013–14 was within 2 percentage points of the citywide dropout rate for all students.

In six school districts (3, 8, 10, 16, 27, and 32) at least 25% of students who experienced homelessness left school without

State Test Pass Rates: Math

Pass Rate Among Homeless Students: 3rd-8th Grade Math Test

SY 2013-2014

- 33.4%–48.9%
- 21.1%–33.3%
- 16.9%–21%
- 12.5%–16.8%
- 9.6%–12.4%

Note: Data is by school district for SY 2013-14 and does not include schools in non-geographic districts.
 Source: New York City Department of Education, unpublished data tabulated by ICPH.

Pass rates for homeless students on both math and English tests varied dramatically by school district in SY 2013-14.

The citywide pass rate for all students on the SY 2013-14 3rd-8th grade State math tests was 34%.

The math pass rate for homeless students was 17% in SY 2013-14, compared to 31% for housed students eligible for free lunch and 49% for housed students not eligible for free lunch.

In SY 2013-14 homeless students passed 3rd-8th grade State math tests at roughly half the rate of housed students eligible for free lunch.

In two districts (2 and 26), 49% of homeless students passed the State math test, compared to only 10% in the lowest performing districts (12 and 23).

State Test Pass Rates: English

Pass Rate Among Homeless Students: 3rd-8th Grade English Language Arts (ELA) Test

SY 2013-2014

- 21.7%–30.9%
- 15.7%–21.6%
- 12.3%–15.6%
- 9%–12.2%
- 6.7%–8.9%

Note: Data is by school district for SY 2013-14 and does not include schools in non-geographic districts.
Source: New York City Department of Education, unpublished data tabulated by ICPH.

Low ELA test pass rates highlight the importance of early education and reaching students during the foundational years of pre-K through 2nd, before testing begins.

The citywide pass rate for all students on the SY 2013-14 3rd-8th grade State English Language Arts (ELA) tests was 28%.

Thirteen percent of homeless students passed State ELA tests in SY 2013-14, compared to 25% of housed students eligible for free lunch and 43% of housed students not eligible for free lunch.

Although pass rates in SY 2013-14 were low throughout New York City, below-average areas tended to cluster near districts with high levels of homelessness and poverty.

In four districts (7, 12, 19 and 23), fewer than 9% of homeless students passed their 3rd-8th grade ELA test in SY 2013-14.

Pass rates among both homeless and housed students for State ELA tests in SY 2013-14 were on average lower than for State math tests.

High School Graduation Patterns

Four Year Graduation Rate of Homeless Students

Class of 2014

- 60.1%–66%
- 52.9%–60%
- 47.5%–52.8%
- 34%–47.4%
- 14.9%–33.9%

Note: Data is by school district and represents the 4-year graduation rate for students who entered high school in 2010 and experienced homelessness at any point during their high school career.

Source: New York City Department of Education, unpublished data tabulated by ICPH.

The large degree of variation in graduation rates among homeless students by district highlights that better graduation rates for homeless students are attainable and warrants a deeper analysis of what is working in certain districts and schools.

The overall citywide four-year graduation rate in SY 2013–14 was 69%.

Homeless students in three districts (4, 21, and 31) achieved graduation rates above 60% in SY 2013–14, putting them near the city's average graduation rate of 69% for housed students eligible for free lunch.

Among homeless or formerly homeless students, fewer than half (48%) graduated in four years, compared to 69% of housed students eligible for free lunch and 86% of housed students not eligible for free lunch in SY 2013–14. In 4 districts (7, 8, 23 and 32), homeless students had graduation rates of less than 34% in SY 2013–14.

4. Homeless Students by District

Children experience homelessness in every one of New York City's 32 school districts. Neighborhood schools may well be the first public agency to discover a child's housing instability. Afterwards these schools provide vital supportive services to homeless children and in some cases to their parents as well. Increasing understanding of student homelessness at the district and school level is therefore vitally important to meeting the needs of children who are at risk for poor educational outcomes and struggling with instability.

This section provides a map of each school district and includes indicators of the percent of students who are homeless by school, as well as resources such as city medical centers that provide free or low-cost vaccines, and homeless and run-away youth centers. Additional information on the number of family shelters and shelter capacity, as well as the type of family shelter, are also listed. Educational outcomes for each school district provide context for how homeless students are doing compared to their housed peers, and each district is ranked by the proportion of students experiencing homelessness to provide a city- and borough-wide comparison.

District 10 in the Bronx had the largest number of homeless students enrolled in the city in SY 2013–14.

District 9 in the Bronx had the highest proportion of students who were homeless in SY 2013–14.

District 9 in the Bronx had the largest number of family shelters and family shelter units.

In SY 2013–14 five school Districts (7, 9, and 12 in the Bronx, and 16, and 23 in Brooklyn) more homeless students were enrolled than students who were housed and not eligible for free lunch.

Glossary of Terms

Cluster Site

Cluster site housing refers to private apartments that the city leases through non-profit and for-profit groups for the purpose of housing homeless families. These sites can be operated on either a contracted or non-contracted basis with the Department of Homeless Services (DHS). Individual cluster sites are not listed because of the lack of publicly available data on these locations.

Chronically Absent

Missing 20 or more days in the school year. Absences do not include days missed due to suspension or school-wide releases.

Dropout Rate (Four-Year)

The percentage of students who entered ninth grade in 2010 and left high school without graduating in four years.

Educational Outcomes

Events that take place during a student's time in school (such as graduation, dropping out, repeating a grade, chronic absenteeism, and standardized test scores) that are known to be affected by whether or not that student is homeless.

Elementary School

Kindergarten through 5th grade.

English Language Arts Test (ELA)

Every year, the New York State Education Department administers standardized tests to students in 3rd through 8th grade in the subjects of Mathematics and English Language Arts. Test scores are recorded on a 4-point scale, with a 3 or 4 constituting a passing score. Although performance on assessment tests are not the only factor, failure to pass can result in students repeating grade levels.

English Language Learner (ELL)

Student who speaks a language other than English at home and scores below proficient on English assessments upon entering the New York City public school system. Students determined to be English Language Learners receive targeted instruction in English as a Second Language, Native Language Arts, and English Language Arts.

Family Homelessness

Homeless families are defined by two separate categories: "families with children" are one- or two-parent households with children under 21, while "adult families" consist of couples or related family members without children under 21. Families with children and adult families have separate shelter systems and must be screened for eligibility upon applying for shelter, although

the law requires that they be temporarily housed during this process. Prior to 2008, data that separates families with children and adult families was not available.

Family Homeless Shelter

Known in New York City as “Tier II” shelters, most family homeless shelters receive payments from the city but are privately owned. Shelter operators provide private rooms for homeless families, along with cafeteria meals or kitchen facilities. The level and availability of social services, including childcare and case management, at each shelter location varies greatly. There are three different categories of Family Shelters: DHS Contracted Shelters, Non-Contracted Shelters, and DHS Operated Shelters.

DHS Contracted Shelters: Contracted Shelters are sites that are privately owned and have an operating contract with the city. These contracts guarantee a level of basic services for families sheltered there and provide the city with more leverage to enforce health and safety violations. Contracted Family Shelters are more likely to be run by non-profit organizations and have social support services for parents and children on site as a part of the larger mission of their organization.

Non-Contracted Shelters: Non-Contracted Shelters operate based on per diem payments from the city. The limited oversight and accountability that results from not having a contract means they are more prone to health and safety violations and less likely to have

social services on site. The Department of Homeless Services utilizes private hotels to shelter homeless families when other space is not available.¹

DHS Directly Operated Shelters: DHS operates a small number of city-owned shelters in New York City.

Family Educational Rights and Privacy Act (FERPA)

A Federal law that protects the privacy of student education records for schools that receive applicable program funds from the U.S. Department of Education.²

Family Shelter Unit

A self-contained, furnished room in a family shelter. Family shelter capacity is counted in units, which usually serve two to four people, rather than being counted as beds, as is done in the single individual homeless population.

Free Lunch

Students are eligible for free or reduced-price lunch if their family earns 185% of the Federal Poverty Level or less—\$36,612 or less for a family of three in 2014.

Graduation Rate (Four-Year)

The percentage of students who entered ninth grade in 2010 and graduated within four years with a Local, Regents, or Advanced Regents diploma.

High School

9th through 12th grade.

Homebase

A program introduced citywide in 2008 by the Department of Homeless Services to offer homelessness-prevention services in individual communities. Offices are operated by contracted social services providers and staffed with caseworkers offering services such as landlord mediation, emergency rental assistance, and benefits enrollment.

Homeless

The New York City Department of Education defines a student as homeless who lacks a fixed, regular, and adequate nighttime residence. Homeless students in this Atlas are divided into the following subcategories:

Doubled up: Students living with another family or other person due to loss of housing or economic hardship.

Sheltered: Students living in city-funded or city-operated emergency or transitional shelter.

Unsheltered: Students living in temporary situations, such as in a car, on the street, in an abandoned building, or any other space not meant for human habitation.

Other: Students living in a hotel/motel that involves payment and those awaiting foster care placement.

Housed, All

All students not identified as homeless (including both housed students eligible for free lunch and housed students not eligible for free lunch).

Housed, Free Lunch

Students not identified as homeless whose family income meets the threshold for receiving free or reduced-price lunch. This is a proxy for students who are poor but not homeless.

Housed, No Free Lunch

Students not identified as homeless who do not receive free or reduced-price lunch. This is a proxy for students who are neither homeless nor poor.

Individual Education Plan/Program (IEP)

An Individual Education Plan is created when a student is deemed eligible for special education services through the Department of Education. This plan details the programs and services that s/he will need in order to be successful in school.

Math Test

Every year, the New York State Education Department administers standardized tests to students in 3rd through 8th grade in the subjects of Mathematics and English Language Arts. Test scores are recorded on a 4-point scale, with a 3 or 4 constituting a passing score. Although performance on assessment tests are not the only factor, failure to pass can result in students repeating grade levels.

McKinney-Vento Homeless Education Assistance Act

A federal law that guarantees equal access to public education for homeless children and youth. As a part of the law, schools are required to identify and immediately register homeless children for school even if they do not have required documents, such as immunization records or proof of residence.³

Middle School

6th through 8th grade.

Pre-K

All children who turn four before January 1st of a given school year are eligible to apply for New York City's Pre-K program. Programs are operated by both the New York City Department of Education and community-based organizations.

New York State Technical & Education Assistance Center for Homeless Students (NYSTEACHS)

The New York State Technical Assistance Center for Homeless Students is an organization funded by the New York State Education Department. It collects data and provides services to schools and other educational agencies pertaining to homeless students and their legal rights.

Non-Geographic School Districts

While most school districts are defined by geography in New York City, a small number of districts are defined by an area of specialization. These districts include District 75 (special education), District 79 (alternative schools and programs) and District 84 (charter schools). Schools administered under these districts can be geographically located anywhere across the city.

Poverty (Federal Poverty Level)

The federal poverty level was first calculated to represent the minimum income an average family needed to afford food and other basic expenses. The 2014 federal poverty level for a family of three is \$19,790.

Students in Temporary Housing Unit

A division within the New York City Department of Education responsible for maintaining records on all students' housing status and providing shelter and school-based liaisons to assist homeless families with basic educational needs.

Suspension Rate

The percentage of students who received one or more suspensions during the school year. (Note: when students are suspended they are provided with an alternate school assignment and are not considered absent from school unless they do not show up for their alternate assignment.)

Note: N's of less than 30 students were redacted. Four-year graduation and dropout rates refer to students who experienced homelessness at any point during their time in high school. Data on Pre-K students enrolled in programs operated by community-based organizations are only available for school districts and are not included here.
